

# BRYAN QUIÑONES

## SOFTWARE TECHNICIAN

### PROFILE

Front-end and mobile developer with experience in web development, Flutter, and React Native. Passionate about creating cross-platform applications optimized for the best user experience. Skilled in problem-solving, teamwork, and code quality. Always looking to learn and contribute innovative solutions.

### EXPERIENCE

#### Customs Internship - 12th internship

2024

IT Area - Software Development

- Creation of Organizational Chart - Organizational structure of the institution - To see the information of the different departments

#### Thesis-TrackerClean

2024

Developer-BackEnd(MVC .NET)

- I implemented reporting functionality, including Base64 image manipulation.
- I developed the connection between the API and the database for efficient report management.
- I optimized the flow of information storage and retrieval within the platform.

#### APP-Couteau

2024

Developer-Flutter

Creator of a mobile app in Flutter, to search for universities through the name of the country with the API, represent 3 main news from a WordPress page, Climate of the resident country.

#### CineSeat

2023

WEB-DEVELOPER

Website creator responsible for managing movies, reservations, and seat selection.

#### Web development (HTML, CSS, JavaScript), .NET (MVC, APIs, Database)

Works such as a digital bank copy with .Net MVC, weather page, cinema seating page, image gallery.

#### Other Technologies

app includes a multiplication table, search for the greatest, least and half of three numbers, a console Keno game, search for universities by country via API, and displays the last three news stories from a WordPress page.

#### Communication—Azure DevOps, Microsoft Teams, Jira.

I have done related university work where I worked as a Scrum Master, Product Owner and developer.
